Supplementary Table 3. Sensitivity Analysis to Predict Negative Disease Course Using Alternative BWT Cutoff Values

Variable (at early follow-up IUS)	No. of patients	Negative disease course	*P*-value	HR (95% CI)
BWT ≥ 5 mm	38	18	0.036	3.72 (1.09–12.67)
BWT ≥ 4 mm	51	20	0.645	1.61 (0.21–12.10)
BWT ≥ 3 mm	55	21	0.999	0

BWT, bowel wall thickness; IUS, intestinal ultrasound; HR, hazard ratio; CI, confidence interval.
