Supplementary Table 6. Descriptive Outcomes by TTD Quartile

TTD quartile[a]	No.	Median TTD (mo)	Mean AT exposures	Median AT exposures	Surgery (n)	Surgery (%)
Q1 (shortest)	71	1	1.18	1	4	5.6
Q2	67	3	1.43	1	5	7.5
Q3	48	6	0.92	1	1	2.1
Q4 (longest)	57	12	1.21	1	7	12.3

Kruskal-Wallis test for AT burden across quartiles: $P=0.245$. Chi-squared test for trend in surgery rate: $P=0.304$. Neither test reached statistical significance.

[a]TTD quartile ranges: Q1, 0–1 months; Q2, 2–3 months; Q3, 4–7 months; Q4, 8–169 months.

TTD, time to diagnosis; AT, advanced therapy.
